

FMS for the NEW AGE

iVolve GoLine: Accessible anywhere, on any device, on one page, iVolve's GoLine provides users from all levels simple access to the iVolve Mine4D apps

iVolve has spent the last three years collaborating closely with their customers to gain an in-depth understanding of how data insights can fit in with, and enhance their daily operations. They have undertaken a new vision of how users at every level can easily gain access to the information they need, when they need it.

The result is a complete rethink of the way people access and use FMS systems.

Introducing GoLine, FMS tailored to the user.

Accessible anywhere, on any device, on one page, iVolve's GoLine provides users from all levels simple access to the iVolve Mine4D apps for real-time monitoring of site operations, viewing real-time notifications, reporting, reviewing and maintaining data,

setting up and configuring assets, and more.

Because GoLine is accessed through a password-protected login, each user's GoLine can be tailored so the information displayed is relevant to them and their job role, whether they are production or maintenance personal, supervisors, engineers, or managers.

Designed for small to mid-sized mines.

Over the past 20 years, iVolve has gained a strong foothold in the mining industry with their Mine4D FMS solutions. The key to this success is a commitment to the intelligent application of technology with the goal of empowering personnel with real-time data insights. The technology itself personifies the core company value of "simple" by

reducing the complexity of mine operations and ensuring an intuitive user experience.

iVolve is unique in the industry in its approach to customer engagement, which focuses on a commitment to long term mutual success. This commitment and focus on customer value underpins the ongoing relationship ensuring continued return on the technology investment.

Scales with you

The flexibility of the iVolve Mine4D system allows customers to explore additional functionality as their operation grows.

By tapping into the data-rich machine interface and the powerful edge computing algorithms of Mine4D, many additional insights become available to GoLine users

as their operation grows.

Kim Parascos, iVolve CEO said, "GoLine provides customers with simple and quick access to key data to make informed decisions in both day-to-day operations and strategic planning. It provides that key information that is relevant specifically to them."

"Customers drive the development and delivery of new technology in our business," she said.
